

Limerick

BioPharma

Job description

Sr. Research Associate/Research Scientist, Bioanalysis/DMPK

Limerick is a biopharmaceutical company located in South San Francisco. It is seeking an independent senior research associate or research scientist to be a key member of the DMPK functions. This position will be working in Limerick DMPK lab located in South San Jose. The position will support drug discovery and development of our small molecule therapeutics programs. The successful candidate should have solid knowledge, and documented track record in bioanalytical chemistry and in vitro/in vivo drug metabolism, and extensive experience in LC/MS/MS (Applied Biosystems and Thermo Fisher) and HPLC-UV. Proficiency in handling biological samples is required. The successful candidate must be able to work effectively in a fast-paced environment with minimal supervision. Excellent communication, organization, flexibility, and collaborative skills are essential. Proficiency in basic database and computational skills is necessary. This candidate should have at least B.S. in Chemistry, Biology, Pharmacology, Life Sciences or related field with minimum 5 years of industry experience in Bioanalysis/DMPK of small molecule. Please forward your resume to careers@limerickbio.com.
